

GHA Provide Screw-In immersion heaters for heating of water and oil. Available in copper, stainless steel or stainless steel with brass screw. Screw available in 1", 1 1/2", and 2" (Thread with BSP or NPT).

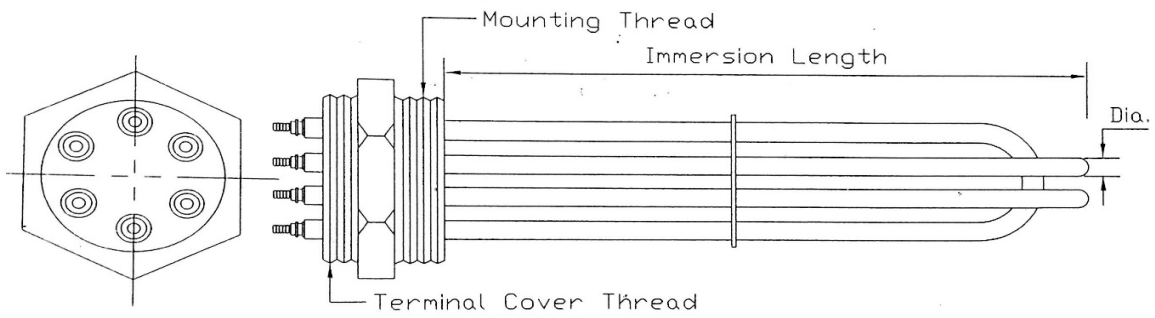

Immersion heaters are used as heat source in domestic water heaters, dish washers, industrial baths, oil radiators and towel dryers among others.

The immersion heaters are build with tubular elements with flanges, nipples or plugs soldered or welded onto them. The immersion heater can be fitted with thermostat, temperature limiter and connection box. There are also thermostats and temperature limiters for mounting inside the tubular element.

GHA holds a standard range of immersion heaters on stock (semi manufactured) for water or oil heating, in different designs for fast delivery.

We also produce according to customer specification. Contact us +604-4466986
If you don't find what you are looking for and we will help you.
