Up mode

Down mode

※ - display is only for F, K, Q, S output operation mode and it cannot be set.

Error Display and Output Operation

Error Display	Error description	Troubleshooting
Err0	Setting value is 0.	Change the setting value anything but 0.

- ※ When error occurs, the output turns OFF.
- ※ Indicator model does not have error display function.

Output Operation Mode

	← One-shot output (0.05 to 5 sec)	← Self-holding output	
Output mode (SW2)	ON Up mode OFF	ON Down mode OFF	Operation
F			After time-up, the display value increases or decreases until reset signal input is applied and self-holding output is maintained.
N			After time-up, the display value and self-holding output are maintained until reset signal input is applied.
C			When time-up, the display value is reset and it operates simultaneously.
R			After time-up, the display value is reset after one-shot output time and it operates simultaneously.
K			After time-up, the display value increases or decreases until reset signal input is applied.
P			After time-up, the display value is maintained while output is ON. The value is internally reset and it operates simultaneously.
Q			After time-up, the display value increases or decreases during one-shot output time.
S			Output turns OFF→ON→OFF operates repeatedly (flicker).

※Set one-shot output time by front TIME volume switch.

■ Proper Usage

- Follow instructions in 'Proper Usage'. Otherwise, it may cause unexpected accidents.
- 24-48VDC, 24VAC power supply should be insulated and limited voltage/current or Class 2, SELV power supply device.
- Use the product, 0.1 sec after supplying power.
- When supplying or turning off the power, use a switch or etc. to avoid chattering.
- Install a power switch or circuit breaker in the easily accessible place for supplying or disconnecting the power.
- Keep away from high voltage lines or power lines to prevent inductive noise.
In case installing power line and input signal line closely, use line filter or varistor at power line and shielded wire at input signal line.
Do not use near the equipment which generates strong magnetic force or high frequency noise.
- Change setting time(T1), time range or etc. after turning off the power of the timer.
- This product may be used in the following environments.
 - ① Indoors (in the environment condition rated in 'Specifications')
 - ② Altitude max. 2,000m
 - ③ Pollution degree 2
 - ④ Installation category II
